CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in sections 1606, 2106a of this title; title 7 section 6614.

§ 2101. Findings, purpose, and policy**(a) Findings**

Congress finds that—

(1) most of the productive forest land of the United States is in private, State, and local governmental ownership, and the capacity of the United States to produce renewable forest resources is significantly dependent on such non-Federal forest lands;

(2) adequate supplies of timber and other forest resources are essential to the United States, and adequate supplies are dependent on efficient methods for establishing, managing, and harvesting trees and processing, marketing, and using wood and wood products;

(3) nearly one-half of the wood supply of the United States comes from nonindustrial private timberlands and such percentage could rise with expanded assistance programs;

(4) managed forest lands provide habitats for fish and wildlife, as well as aesthetics, outdoor recreation opportunities, and other forest resources;

(5) the soil, water, and air quality of the United States can be maintained and improved through good stewardship of privately held forest resources;

(6) insects and diseases affecting trees occur and sometimes create emergency conditions on all land, whether Federal or non-Federal, and efforts to prevent and control such insects and diseases often require coordinated action by both Federal and non-Federal land managers;

(7) fires in rural areas threaten human lives, property, forests and other resources, and Federal-State cooperation in forest fire protection has proven effective and valuable;

(8) trees and forests are of great environmental and economic value to urban areas;

(9) managed forests contribute to improving the quality, quantity, and timing of water yields that are of broad benefit to society;

(10) over half the forest lands of the United States are in need of some type of conservation treatment;

(11) forest landowners are being faced with increased pressure to convert their forest land to development and other purposes;

(12) increased population pressures and user demands are being placed on private, as well as public, landholders to provide a wide variety of products and services, including fish and wildlife habitat, aesthetic quality, and recreational opportunities;

(13) stewardship of privately held forest resources requires a long-term commitment that can be fostered through local, State, and Federal governmental actions;

(14) the Department of Agriculture, through the coordinated efforts of its agencies with forestry responsibilities, cooperating with other Federal agencies, State foresters, and State political subdivisions, has the expertise and experience to assist private landowners in achieving individual goals and public benefits regarding forestry;

(15) the products and services resulting from nonindustrial private forest land stewardship provide income and employment that contribute to the economic health and diversity of rural communities;¹

¹ See 1990 Amendment note below.

(16) sustainable agroforestry systems and tree planting in semiarid lands can improve environmental quality and maintain farm yields and income; and¹

(18)² the same forest resource supply, protection, and management issues that exist in the United States are also present on an international scale, and the forest and rangeland renewable resources of the world are threatened by deforestation due to conversion to agriculture of lands better suited to other purposes, over-grazing, over-harvesting, and other causes which pose a direct adverse threat to people, the global environment, and the world economy.¹

(b) Purpose

It is the purpose of this chapter to authorize the Secretary of Agriculture (hereafter in this chapter referred to as the “Secretary”), with respect to non-Federal forest lands in the United States, and forest lands in foreign countries, of the United States, to assist in—

(1) the establishment of a coordinated and cooperative Federal, State, and local forest stewardship program for management of the non-Federal forest lands;

(2) the encouragement of the production of timber;

(3) the prevention and control of insects and diseases affecting trees and forests;

(4) the prevention and control of rural fires;

(5) the efficient utilization of wood and wood residues, including the recycling of wood fiber;

(6) the improvement and maintenance of fish and wildlife habitat;

(7) the planning and conduct of urban forestry programs;

(8) broadening existing forest management, fire protection, and insect and disease protection programs on non-Federal forest lands to meet the multiple use objectives of landowners in an environmentally sensitive manner;

(9) providing opportunities to private landowners to protect ecologically valuable and threatened non-Federal forest lands; and

(10) strengthening educational, technical, and financial assistance programs that provide assistance to owners of non-Federal forest lands in the United States, and forest lands in foreign countries.³

(c) Policy

It is the policy of Congress that it is in the national interest for the Secretary to work through and in cooperation with State foresters, or equivalent State officials, nongovernmental organizations, and the private sector in implementing Federal programs affecting non-Federal forest lands.

(d) Construction

This chapter shall be construed to complement the policies and direction under the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1600 et seq.).

This chapter, referred to in subsecs. (b) and (d), was in the original “this Act”, meaning Pub. L. 95-313, July 1, 1978, 92 Stat. 365, known as the Cooperative Forestry Assistance Act of 1978. For complete classification of this Act to the Code, see Short Title note set out below and Tables.

The Forest and Rangeland Renewable Resources Planning Act of 1974, referred to in subsec. (d), is Pub. L. 93-378, Aug. 17, 1974, 88 Stat. 476, as amended, which is classified generally to subchapter I (§1600 et seq.) of chapter 36 of this title. CODIFICATION

Pub. L. 101-513 and Pub. L. 101-624 were approved by the President after Congress adjourned and in reverse order of passage by Congress. Accordingly, the amendments made by Pub. L. 101-624 were executed to text prior to the amendments made by Pub. L. 101-513 to reflect the probable intent of Congress.

AMENDMENTS

1990—Pub. L. 101-624 amended section generally, substituting present provisions for provisions which set forth Congressional findings and declarations, and statements of purpose and national interest, and which related to application with forest and rangeland renewable resources provisions. See Codification note above.

Pub. L. 101-513, § 607(b)(1), directed the amendment of subsec. (a) by striking out “and” at end of par. (16), substituting “; and” for period at end of par. (17), and adding par. (18) at end. The amendment of pars. (16) and (17) was executed to pars. (15) and (16) to reflect the probable intent of Congress. See Codification note above.

Pub. L. 101-513, § 607(b)(2), which directed the amendment of subsec. (b) by inserting “in the United States, and forest lands in foreign countries,” after “non-Federal forest lands,” the first place it appears and in paragraph (10), was executed by making the insertion after “non-Federal forest lands” to reflect the probable intent of Congress. See Codification note above.

L. 87-492, June 25, 1962, 76 Stat. 107, provided: “That the Congress recognizes that for many years the United States and certain States have cooperated in the production of tree planting stock for use in the reforestation of the public and private lands of the Nation; that the program of production of tree planting

stock which was initiated and pursued under the Soil Bank Act (7 U.S.C. 1801 et seq.) [repealed] was carried on under written agreements which provided for (a) co-operation between the Forest Service, on behalf of the United States, and the States which participated in the program, (b) payments to said States for costs and expenses incurred in the development of nursery facilities, (c) the holding of such funds by the States in trust for the purpose of carrying out the provisions of said agreements, and (d) restoration to the trust fund of an amount equal to the residual value of any supplies, materials, equipment, or improvements acquired or constructed with trust funds and transferred to State forestry work other than the soil bank program; that such program under said Soil Bank Act has been discontinued, but the need for the trees continues to be great; that the States and Federal Government are cooperating in the procurement, production, and distribution of forest-tree seeds and plants under section 4 of the Clarke-McNary Act of June 7, 1924 (16 U.S.C. 567), and in the reforestation of lands under title IV of the Agricultural Act of 1956 (16 U.S.C. 568e and 568g); and that said participating States need the said supplies, materials, equipment, or improvements for use in connection with their respective forestry programs, and it is in the public interest to permit these States to use said property without the requirement that payment be made for the residual value thereof.

“SEC. 2. For the purpose of assisting those States which participated in the program carried on under the Soil Bank Act [section 1801 et seq. of Title 7, Agriculture] [repealed] in continuing the production of needed tree planting stock and in other forestry programs, the Secretary of Agriculture is authorized to permit any supplies, materials, equipment, or improvements acquired or constructed with trust funds under the agreements referred to in section 1 to be used in such State forestry work as may further the objectives of related Federal programs, as he may approve, without the requirement that any payment be made by the State into the trust funds.”

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 2109 of this title.

§ 2103. Forestry incentives program**(a) Development and implementation; statement of purposes**

The Secretary is authorized to develop and implement a forestry incentives program to encourage the development, management, and protection of nonindustrial private forest lands. The purposes of such program shall be to encourage landowners to apply practices that will provide for afforestation of suitable open lands, reforestation of cutover or other nonstocked or understocked forest lands, timber stand improvement practices, including thinning, prescribed burning, and other silvicultural treatments, and forest resources management and protection, so as to provide for the production of timber and other forest resources associated therewith.

(b) “Private forest land” defined

For the purposes of this section, the term “private forest land” means land capable of producing crops of industrial wood and owned by any private individual, group, Indian tribe or other native group, association, corporation, or other legal entity.

(c) Eligibility of landowners for cost sharing; exception; limitation on approval of cost sharing

Landowners shall be eligible for cost sharing under this program if they own one thousand acres or less of private forest land, except that the Secretary may approve cost sharing with landowners owning more than one thousand acres of such land if significant public benefits will accrue. In no case, however, may the Secretary approve cost sharing with landowners owning more than five thousand acres of private forest land.

(d) Administration

The Secretary shall administer this section in accordance with regulations the Secretary shall develop in consultation with the committee described in section 2109(c) of this title. Regulations issued under title X of the Agricultural Act of 1970 [16 U.S.C. 1501 et seq.], as added by the Agriculture and Consumer Protection Act of 1973, to the extent not inconsistent with the provisions of this section, shall remain in effect until revoked or amended by regulations issued

under this subsection. The regulations issued under this subsection shall include guidelines for the administration of this section at the Federal and State levels, and shall identify the measures and activities eligible for cost sharing under this section.

Individual forest management plans developed by the landowner in cooperation with and approved by the State forester or equivalent State official shall be the basis for agreements between the landowner and the Secretary under this section. The Secretary shall encourage participating States to use private agencies, consultants, organizations, and firms to the extent feasible for the preparation of individual forest management plans.

(f) Cost sharing for implementation of appropriate forestry practices and measures set forth in agreement; apportionment; maximum amount

In return for the agreement by the landowner, the Secretary shall agree to share the cost of implementing those forestry practices and measures set forth in the agreement for which the Secretary determines that cost sharing is appropriate. The portion of such cost (including labor) to be shared shall be that portion that the Secretary determines is necessary and appropriate to implement the forestry practices and measures under the agreement, but not more than 75 percent of the actual costs incurred by the landowner. The maximum amount any individual may receive annually under the program authorized by this section shall be determined by the Secretary in consultation with the committee described in section 2109(c) of this title.

(g) Prerequisites for distribution of funds available for cost sharing

The Secretary shall, for the purposes of this section, distribute funds available for cost sharing among the States only after assessing the public benefit incident thereto, and after giving appropriate consideration to (1) the acreage of private commercial forest land in each State, (2) the potential productivity of such land, (3) the number of ownerships eligible for cost sharing in each State, (4) the need for reforestation, timber stand improvement, or other forestry investments on such ownerships, and (5) the enhancement of other forest resources.

(h) Use of advertising and bid procedure in determining lands to be covered by agreements; prerequisites

§ 2103a. Forest Stewardship Program

(a) Establishment

The Secretary, in consultation with State foresters or equivalent State officials, shall establish a Forest Stewardship Program (hereafter referred to in this section as the “Program”) to encourage the long-term stewardship of non-industrial private forest lands by assisting owners of such lands to more actively manage their forest and related resources by utilizing existing State, Federal, and private sector resource management expertise and assistance programs.

(b) Goal

The goal of the Program shall be to enter at least 25,000,000 acres of nonindustrial private forest lands in the Program by December 31, 1995.

(c) “Nonindustrial private forest lands” defined

For the purposes of this section, the term “nonindustrial private forest lands” means rural, as determined by the Secretary, lands with existing tree cover, or suitable for growing trees, and owned by any private individual, group, association, corporation, Indian tribe, or other private legal entity.

(d) Implementation

In carrying out the Program the Secretary, in consultation with State foresters or equivalent State officials, shall provide financial, technical, educational, and related assistance to

State foresters or equivalent State officials, including assistance to help such State foresters or equivalent officials to provide financial assistance to other State and local natural resource entities, both public and private, and land-grant universities for the delivery of information and professional assistance to owners of nonindustrial private forest lands. Such information and assistance shall be directed to help such owners understand and evaluate alternative actions they might take, including—

(1) managing and enhancing the productivity of timber, fish and wildlife habitat, water quality, wetlands, recreational resources, and the aesthetic value of forest lands;

(2) investing in practices to protect, maintain, and enhance the resources identified in paragraph (1);

(3) ensuring that afforestation, reforestation, improvement of poorly stocked stands, timber stand improvement, practices necessary to improve seedling growth and survival, and growth enhancement practices occur where needed to enhance and sustain the long-term productivity of timber and nontimber forest resources to help meet future public demand for all forest resources and provide the environmental benefits that result; and

(4) protecting their forests from damage caused by fire, insects, disease, and damaging weather.

(e) Eligibility

All nonindustrial private forest lands that are not in management under Federal, State, or private sector financial and technical assistance programs existing on November 28, 1990, are eligible for assistance under the Program. Non-industrial private forest lands that are managed under such existing programs are eligible for assistance under the Program if forest management activities are expanded and enhanced and the landowner agrees to meet the requirements of this chapter.

(f) Duties of owners

To enter forest land into the Program, landowners shall—

(1) prepare and submit to the State forester or equivalent State official a forest stewardship plan that meets the requirements of this section and that—

(A) is prepared by a professional resource manager;

(B) identifies and describes actions to be taken by the landowner to protect soil, water, range, aesthetic quality, recreation, timber, water, and fish and wildlife resources on such land in a manner that is compatible with the objectives of the landowner; and

(C) is approved by the State forester, or equivalent State official; and

(2) agree that all activities conducted on such land shall be consistent with the stewardship plan.

(g) Stewardship recognition

The Secretary, in consultation with State foresters or equivalent State officials, is encouraged to develop an appropriate recognition program for landowners who practice stewardship

management on their lands, with an appropriate, special recognition symbol and title.

(h) Authorization of appropriations

There are hereby authorized to be appropriated \$25,000,000 for each of the fiscal years 1991 through 1995, and such sums as may be necessary thereafter, to carry out this section.

(Pub. L. 95-313, § 5, as added Pub. L. 101-624, title XII, § 1215(2), Nov. 28, 1990, 104 Stat. 3525; amended Pub. L. 102-237, title X, § 1018(a)(1), Dec. 13, 1991, 105 Stat. 1905.)

A prior section 6 of Pub. L. 95-313 was renumbered section 9 and is classified to section 2105 of this title.

§ 2103c. Forest Legacy Program

(a) Establishment and purpose

The Secretary shall establish a program, to be known as the Forest Legacy Program, in cooperation with appropriate State, regional, and other units of government for the purposes of ascertaining and protecting environmentally important forest areas that are threatened by conversion to nonforest uses and, through the use of conservation easements and other mechanisms, for promoting forest land protection and other conservation opportunities. Such purposes shall also include the protection of important scenic, cultural, fish, wildlife, and recreational resources, riparian areas, and other ecological values.

(b) State and regional forest legacy programs

The Secretary shall exercise the authority under subsection (a) of this section in conjunction with State or regional programs that the Secretary deems consistent with this section.

(c) Interests in land

In addition to the authorities granted under section 515 of this title and section 428a(a) of title 7, the Secretary may acquire from willing

landowners lands and interests therein, including conservation easements and rights of public access, for Forest Legacy Program purposes. The Secretary shall not acquire conservation easements with title held in common ownership with any other entity.

(d) Implementation

(1) In general

Lands and interests therein acquired under subsection (c) of this section may be held in perpetuity for program and easement administration purposes as the Secretary may provide. In administering lands and interests therein under the program, the Secretary shall identify the environmental values to be protected by entry of the lands into the program, management activities which are planned and the manner in which they may affect the values identified, and obtain from the landowner other information determined appropriate for administration and management purposes.

(2) Initial programs

Not later than November 28, 1991, the Secretary shall establish a regional program in furtherance of the Northern Forest Lands Study in the States of New York, New Hampshire, Vermont, and Maine under Public Law 100-446. The Secretary shall establish additional programs in each of the Northeast, Midwest, South, and Western regions of the United States, and the Pacific Northwest (including the State of Washington), on the preparation of an assessment of the need for such programs.

(e) Eligibility

Not later than November 28, 1991, and in consultation with State Forest Stewardship Coordinating Committees established under section 2113(b) of this title and similar regional organizations, the Secretary shall establish eligibility criteria for the designation of forest areas from which lands may be entered into the Forest Legacy Program and subsequently select such appropriate areas. To be eligible, such areas shall have significant environmental values or shall be threatened by present or future conversion to nonforest uses. Of land proposed to be included in the Forest Legacy Program, the Secretary shall give priority to lands which can be effectively protected and managed, and which have important scenic or recreational values; riparian areas; fish and wildlife values, including threatened and endangered species; or other ecological values.

(f) Application

For areas included in the Forest Legacy Program, an owner of lands or interests in lands who wishes to participate may prepare and submit an application at such time in such form and containing such information as the Secretary may prescribe. The Secretary shall give reasonable advance notice for the submission of all applications to the State forester, equivalent State official, or other appropriate State or regional natural resource management agency. If applications exceed the ability of the Secretary to fund them, priority shall be given to those

forest areas having the greatest need for protection pursuant to the criteria described in subsection (e) of this section.

(g) State consent

Where a State has not approved the acquisition of land under section 515 of this title, the Secretary shall not acquire lands or interests therein under authority granted by this section outside an area of that State designated as a part of a program established under subsection (b) of this section.

(h) Forest management activities

(1) In general

Conservation easements or deed reservations acquired or reserved pursuant to this section may allow forest management activities, including timber management, on areas entered in the Forest Legacy Program insofar as the Secretary deems such activities consistent with the purposes of this section.

(2) Assignment of responsibilities

For Forest Legacy Program areas, the Secretary may delegate or assign management and enforcement responsibilities over federally owned lands and interests in lands only to another governmental entity.

(i) Duties of owners

Under the terms of a conservation easement or other property interest acquired under subsection (b)¹ of this section, the landowner shall be required to manage property in a manner that is consistent with the purposes for which the land was entered in the Forest Legacy Program and shall not convert such property to other uses. Hunting, fishing, hiking, and similar recreational uses shall not be considered inconsistent with the purposes of this program.

(j) Compensation and cost sharing

(1) Compensation

The Secretary shall pay the fair market value of any property interest acquired under this section. Payments under this section shall be in accordance with Federal appraisal and acquisition standards and procedures.

(2) Cost sharing

In accordance with terms and conditions that the Secretary shall prescribe, costs for the acquisition of lands or interests therein or project costs shall be shared among participating entities including regional organizations, State and other governmental units, landowners, corporations, or private organizations. Such costs may include, but are not limited to, those associated with planning, administration, property acquisition, and property management. To the extent practicable, the Federal share of total program costs shall not exceed 75 percent, including any in-kind contribution.

(k) Easements

(1) Reserved interest deeds

As used in this section, the term “conservation easement” includes an easement utilizing

a reserved interest deed where the grantee acquires all rights, title, and interests in a property, except those rights, title, and interests that may run with the land that are expressly reserved by a grantor.

(2) Prohibitions on limitations

Notwithstanding any provision of State law, no conservation easement held by the United States or its successors or assigns under this section shall be limited in duration or scope or be defeasible by—

(A) the conservation easement being in gross or appurtenant;

(B) the management of the conservation easement having been delegated or assigned to a non-Federal entity;

(C) any requirement under State law for re-recording or renewal of the easement; or

(D) any future disestablishment of a Forest Legacy Program area or other Federal project for which the conservation easement was originally acquired.

(3) Construction

Notwithstanding any provision of State law, conservation easements shall be construed to effect the Federal purposes for which they were acquired and, in interpreting their terms, there shall be no presumption favoring the conservation easement holder or fee owner.

(l) Appropriation

There are authorized to be appropriated such sums as may be necessary to carry out this section.

§ 2105. Urban and community forestry assistance

(a) Findings

The Congress finds that—

(1) the health of forests in urban areas and communities, including cities, their suburbs, and towns, in the United States is on the decline;

(2) forest lands, shade trees, and open spaces in urban areas and communities improve the quality of life for residents;

(3) forest lands and associated natural resources enhance the economic value of residential and commercial property in urban and community settings;

(4) urban trees are 15 times more effective than forest trees at reducing the buildup of carbon dioxide and aid in promoting energy conservation through mitigation of the heat island effect in urban areas;

(5) tree plantings and ground covers such as low growing dense perennial turfgrass sod in urban areas and communities can aid in reducing carbon dioxide emissions, mitigating the heat island effect, and reducing energy consumption, thus contributing to efforts to reduce global warming trends;

(6) efforts to encourage tree plantings and protect existing open spaces in urban areas

and communities can contribute to the social well-being and promote a sense of community in these areas; and

(7) strengthened research, education, technical assistance, and public information and participation in tree planting and maintenance programs for trees and complementary ground covers for urban and community forests are needed to provide for the protection and expansion of tree cover and open space in urban areas and communities.

(b) Purposes

The purposes of this section are to—

(1) improve understanding of the benefits of preserving existing tree cover in urban areas and communities;

(2) encourage owners of private residences and commercial properties to maintain trees and expand forest cover on their properties;

(3) provide education programs and technical assistance to State and local organizations (including community associations and schools) in maintaining forested lands and individual trees in urban and community settings and identifying appropriate tree species and sites for expanding forest cover;

(4) provide assistance through competitive matching grants awarded to local units of government, approved organizations that meet the requirements of section 501(c)(3) of title 26, or other local community tree volunteer groups, for urban and community forestry projects;

(5) implement a tree planting program to complement urban and community tree maintenance and open space programs and to reduce carbon dioxide emissions, conserve energy, and improve air quality in addition to providing other environmental benefits;

(6) promote the establishment of demonstration projects in selected urban and community settings to illustrate the benefits of maintaining and creating forest cover and trees;

(7) enhance the technical skills and understanding of sound tree maintenance and arboricultural practices including practices involving the cultivation of trees, shrubs and complementary ground covers, of individuals involved in the planning, development, and maintenance of urban and community forests and trees; and

(8) expand existing research and educational efforts intended to improve understanding of—

(A) tree growth and maintenance, tree physiology and morphology, species adaptations, and forest ecology,

(B) the value of integrating trees and ground covers,

(C) the economic, environmental, social, and psychological benefits of trees and forest cover in urban and community environments, and

(D) the role of urban trees in conserving energy and mitigating the urban heat island.

(c) General authority

The Secretary is authorized to provide financial, technical, and related assistance to State foresters or equivalent State officials for the purpose of encouraging States to provide information and technical assistance to units of local

government and others that will encourage cooperative efforts to plan urban forestry programs and to plant, protect, and maintain, and utilize wood from, trees in open spaces, greenbelts, roadside screens, parks, woodlands, curb areas, and residential developments in urban areas. In providing such assistance, the Secretary is authorized to cooperate with interested members of the public, including nonprofit private organizations. The Secretary is also authorized to cooperate directly with units of local government and others in implementing this section whenever the Secretary and the affected State forester or equivalent State official agree that direct cooperation would better achieve the purposes of this section.

(d) Program of education and technical assistance

The Secretary, in cooperation with State foresters and State extension directors or equivalent State officials and interested members of the public, including nonprofit private organizations, shall implement a program of education and technical assistance for urban and community forest resources. The program shall be designed to—

(1) assist urban areas and communities in conducting inventories of their forest resources, including inventories of the species, number, location, and health of trees in urban areas and communities, identifying opportunities for the establishment of plantings for the purposes of conserving energy, and determining the status of related resources (including fish and wildlife habitat, water resources, and trails);

(2) assist State and local organizations (including community associations and schools) in organizing and conducting urban and community forestry projects and programs;

(3) improve education and technical support in—

(A) selecting tree species appropriate for planting in urban and community environments and for promotion of energy conservation;

(B) providing for proper tree planting, maintenance, and protection in urban areas and communities;

(C) protecting individual trees and preserving existing open spaces with or without tree cover; and

(D) identifying opportunities for expanding tree cover in urban areas and communities;

(4) assist in the development of State and local management plans for trees and associated resources in urban areas and communities; and

(5) increase public understanding of the energy conservation, economic, social, environmental, and psychological values of trees and open space in urban and community environments and expand knowledge of the ecological relationships and benefits of trees and related resources in these environments.

(e) Procurement of plant materials

The Secretary, in cooperation with State foresters or equivalent State officials, shall assist in identifying sources of plant materials and

may procure or otherwise obtain such plant materials from public or private sources and may make such plant materials available to urban areas and communities for the purpose of reforesting open spaces, replacing dead and dying urban trees, promoting energy conservation, and providing other environmental benefits through expanding tree cover in urban areas and communities.

(f) Challenge cost-share program

(1) In general

The Secretary shall establish an urban and community forestry challenge cost-share program. Funds or other support shall be provided under such program to eligible communities and organizations, on a competitive basis, for urban and community forestry projects. Each State forester or equivalent State official may make recommendations to the Secretary for awards under the program for project proposals in their State which meet such criteria. Awards shall be consistent with the cost-share requirements of this section.

(2) Cost-sharing
